Healthwise for Point of Care
For EMR Organizations

An easy patient-education solution for meaningful use

Healthwise for Point of Care is a complete health content solution for your EMR or PHR product. Concise, point-of-care information that works "overtime" with a connection to more information online.

Increase efficiency and deliver a better, more patient-centered standard of care. Give your customers the tools they need to provide patients and families with patient education that's in-depth, evidence-based, and easy to understand.

Deliver it yesterday

Healthwise for Point of Care is built for efficient, standards-based integration into your system. Our experienced technical team will work with you to deliver the content per your product requirements. The Healthwise® Patient Education EMR Module, a CCHIT certified pre-built interface, allows clinicians to select, personalize, and deliver patient education within your EMR.

Make it meaningful and valuable

Healthwise for Point of Care delivers the specific patient education resources providers look for so they can meet—and get paid for—their patient accreditation requirements, including Meaningful Use.

Integrate consistent content for every point of care

This is evidence-based patient education that's consistent wherever clinicians deliver information—during the visit, from the EMR, or into the PHR. Help your customers establish a patient-centered standard of care with up-to-date and connected information that's easy for clinicians to use and easy for patients to understand.

Satisfy the needs of your customers, patients, and clinicians

Healthwise patient education offers the highest degree of patient and clinician satisfaction and the best possible results. How do we know? Healthwise puts content and functionality to the test with users across the board.

Meet patient education accreditation requirements

Your customers will be happy to hear that Healthwise for Point of Care supports the latest standards-of-care accreditation requirements and clinically accepted guidelines, including the Joint Commission Requirements for discharge instructions, Physician Clinical Quality Measures for reporting, and HEDIS measures. Our consistent and connected solution enables easy delivery of patient-friendly education as an integral part of provider care.

healthwise®
for every health decision®

Efficiently improve care quality and outcomes with patient-specific education.

Healthwise for Point of Care puts patient-specific information at clinicians' fingertips, including:

+ Over 3,500 Patient Instructions in English and Spanish, plus the most commonly used instructions in 13 additional languages. These visually enhanced two-page documents give patients the clear and comprehensive take-home instructions they need to take an active role in their care.

+ Trusted, reliable, and up-to-date drug leaflets from Multum, covering more than 3,000 over-the-counter and prescription medicines.

+ Engaging videos and shared decision making tools to better involve patients in their care.

+ The ability to print or send tailored health education to patients at the point of care or via a secure message center.

+ Go-to-Web codes directing patients to more information online.

The Healthwise® Knowledgebase for your PHR product gives your customers the ability to deliver—through contextual links or self-search—the specific patient education resources that:

+ Help patients make sense of their health data found in their medical record.

+ Present action-oriented information.

+ Include hundreds of interactive tools and resources.

+ Provide more than 8,000 evidence-based topics that are easy to use and understand—in patient-friendly language.

Additional Features:

+ **Healthwise® Decision Aids:**
  Step-by-step decision aids help patients better understand their choices, compare risks versus benefits, and make a decision that is right for them with the help of their provider.

+ **Healthwise® Video Library:**
  More than 600 short, "bite-sized" videos make it easy for patients to take in—and then take on what's next in their health care.

+ **Healthwise® Custom Content Manager:**
  Custom Content Manager gives your customers complete control over their patient education strategy by letting them import content, create new content, edit Healthwise education, and manage corresponding metadata, within their Healthwise Solution.
